**Laser Spine Institute Launches Online Physical Therapy Video Series
For Enhanced Patient Experience**

*Leader In Endoscopic Spine Surgery Incorporates Comprehensive Therapy Videos
To Address Additional Patient Needs*

TAMPA, FLA. – Bill Horne, CEO of Laser Spine Institute (<http://www.laserspineinstitute.com>), the leader in endoscopic spine surgery, has announced the launch of the facility's online physical therapy video series, a comprehensive video collection developed to address patient needs and maximize surgical outcomes through detailed instructional presentations. Providing an additional level of medical care, the physical therapy video series is a supplemental piece that contributes to post-surgical recovery, overall fitness and quality of life and healthy spinal function. With each postoperative appointment, patients will utilize the videos to assist in functional activity approaches and at-home post-surgical exercises.

QUOTE:

"We are fully committed to seeing our patients through a successful and complete spinal surgery recovery," said Horne. "Whether it is providing advice on transitioning into day-to-day functionality or performing the prescribed post-surgical exercises, the overall goal is to continuously serve patients and provide a full recovery and improved quality of life."
