Experience

Born and raised in Ohio, Dr. Brad Picha is proud to call the Buckeye State home. In fact, he earned his bachelor's degree from Denison University in Granville and his medical degree from Case Western Reserve University School of Medicine in Cleveland. He then went on to complete both his internship and residency in Dayton, Ohio, at Wright State University Department of Medicine.

Dr. Picha first became interested in working at Laser Spine Institute after a family member's successful outcome with our minimally invasive spine surgery. As an Orthopedic Surgeon in our Cleveland facility, his goal is to improve his patients' quality of life and help relieve pain, while focusing on their overall health and wellness.

When not helping patients find lasting relief, Dr. Picha enjoys giving his time and talents to worthy causes. He's served as a volunteer emergency medical technician with his local fire department and even traveled to Haiti after the earthquake to render medical aid. He considers the birth of his two sons to be one of the proudest moments of his life and says spending time with them and his wife in the state they call home brings him much joy.
