## Experience

From the moment you meet him, you'll feel his bold sense of purpose and unwavering zest for life. This is exactly what Dr. Robert Koser, D.C. wants everyone to experience. To him, empowering others to achieve optimal health isn't just a job — it's a calling.

Dr. Koser witnessed the power of healing early in life. As a child, he would spend time after school at his father's medical practice or tag along for hospital rounds, watching him improve the lives of his patients. Seeing the gratitude his patients expressed had a profound effect on the younger Koser, and that's how he knew from a young age that one day he'd pursue a career helping others.

It wasn't until he sought treatment for a car accident that Dr. Koser knew he'd embark on his journey to become a Chiropractic Physician. As a patient he was able to see firsthand the benefits conservative care could provide. The experience also inspired him to become certified in another holistic treatment — acupuncture.

Dr. Koser received his Doctor of Chiropractic designation from National University of Health Sciences and his Bachelor of Science degree in microbiology and Bachelor of Arts degree in Anthropology from the University of South Florida. In 2018, he received additional training and credentials in MRI of the spine through the University at Buffalo Jacobs School of Medicine and Biomedical Sciences.

Dr. Koser stays true to his own health and wellness by following the same advice he gives to patients — to eat right, exercise and always live in the moment. His integrated approach to care involves laying the groundwork for success, providing encouragement along the way, adjusting course when needed and celebrating shared goals.

When not helping his teammates or patients be at their best, Dr. Koser spends quality time with his family. On any given weekend, you can find him enjoying the great outdoors with his wife and daughter. He also enjoys exploring different cultures through food, wine and travel. An avid musician, Dr. Koser plays guitar, bass and drums.
