HEADQUARTERS

Helping people get back to doing the things they love

In May 2016, we moved our headquarters and surgery center to Tampa’s Avion Park, but that doesn’t change who we are and why we do what we do. Our new building is designed from the ground up to deliver on our promise of providing patient-centric care. Every panel of glass, shred of steel, ounce of aluminum and drop of concrete that’s going into the construction of our new headquarters advances our company mission: helping people get back to doing the things they love.

BETTER CARE FOR OUR PATIENTS

**40% increase in capacity**
We’ve added 10 all-new, state-of-the-art operating rooms.

**Over 100 new employees hired**
Each of these employees will play a part in helping our patients get back to the things they love most.

**The ability to see 25% more patients**
That’s over 300 patients a year.

**20% closer to the Tampa International Airport**
This convenient location helps our patients with debilitating neck and back pain with shorter, less arduous travel to our facilities.

MADE POSSIBLE BY STATE-OF-THE-ART CONSTRUCTION

**Size**
- 3.7 acre site
- 176,000 sq ft.

**Highest Point**
- 134 ft. in the air

**Aluminum**
The amount of aluminum in the metal composition panels on the facade and parapet equals the amount of aluminum in 649,729 soda cans. That’s a lot of soda.

**Steel**
If you took the rebar/steel rods used to construct the building and laid them end-to-end, it would equal 20 round trips to the International Space Station.

**Glass**
To clean the total amount of glass on the building you would need 182 32oz. bottles of Windex.

**Concrete**
The total weight of the concrete poured to construct the building weighs as much as 900 full-grown adult elephants, or a 41 mile sidewalk.
